

Bracelet Size Chart Measurements

Note: This chart is not standard for all brands but is only a reference for Lauri-Li- Design sizing, custom sizes can be available too on request.

Wrist Measurement (CM)	Wrist Measurement (INCHES)	
15 - 16.5 cm	5.9 - 6.5"	Small
17.5 - 18.5 cm	6.9 - 7.3"	Medium
19.7 - 21cm	7.76" - 8.25"	Large

Ways to measure for your bracelet.

1. Measure your wrist size

Step 1: Wrap the tape measure around the wrist bone, so that it fits snugly without feeling too tight or too loose.

Step 2: Mark where the tape measure overlaps. This is the exact circumference of your wrist.

Note: You can substitute the measuring tape with a string or ribbon and use a straight ruler to measure the length from the point of overlap to the end.

2. Measure the length of a bracelet that fits well

If you already have a chain bracelet that fits right, this is how to substitute wrist tape measurements with the bracelet chain length:

Step 1: Open your bracelet and place it on the table

Step 2: Using the centimetre/inch edge of a ruler, measure the length of the bracelet cord/chain from the outer edge of the clasp to the other end of the bracelet.
